## Adjustable Transformer Sling

Move electrical transformers safely and easily with our innovative new Transformer Sling. This high-strength hoisting sling is engineered specifically to meet the unique needs of utility workers, allowing them to transport transformers faster, more reliably, and with less effort.

Pelican Rope's Transformer Sling adapts to fit an extensive range of load sizes by incorporating a 6" or 12" fixed spliced eye on one end and a fully adjustable eye on the other. Its unmatched, highly adjustable configuration streamlines the lifting of transformers to elevated heights.
