

ProClimb® V2 Wire Core Flipline System

FAMILY: FLK33

The ProClimb® engineers developed this flipline with a special swaging process to secure both the wire rope and the tough 16-strand steel rope sheath as a secure system. The result is the ProClimb® V2 ½-inch Wire Core Flipline System from Pelican Rope, designed to protect you while you ascend and descend trees quickly and with ease. This essential arborist tool combines Pelican Rope's 16-strand over-braid wire rope with our robust ProClimb Steel Swivel Snap Hook and ProClimb Better Grab Removable Rope Grab, resulting in an innovative flipline you can depend on.

Features & Benefits

- Diameter: 1/2"
- Construction: 16-Strand Over Braid
