

SPEEDLINE KIT

Family Code: SL

If you haven't yet discovered the game-changing benefits of using a speedline setup in tree care, you're truly missing out. This kit, complete with just a rope, revolutionizes how you handle tree removal tasks. Swiftly transport cut pieces directly to the ground near the chipper truck, streamlining your workflow and drastically reducing effort. Equipped with an aluminum double-action snaphook and a choice of a 26" or 40" tubular Nylon sling, the ProClimb® Speedline Kit is designed for easy replacement and extended durability. Don't miss out on the advantages of incorporating this essential tool into your tree care operations today.
